TELEPHONE ENCOUNTER

Date of service 04/20/2026 (Mon) · 12:10 PM · 20 minutes · Established patient · No charge

PATIENT	DOB	MRN
DOE, JOHN	08/14/1991	LKO-218840
SCHEDULED	DATE OF INJURY	BILLING
04/17/2026 at patient's request (call placed by his attorney's office, scheduling only)	02/06/2026	Not billed ($0.00)

Reason for call

Patient asked to speak with me about missed therapy and "not being able to get in a car".

Subjective

Last attended PT at Riverton Spine & Rehab 04/02/2026; missed 04/03, 04/07, 04/09 and 04/14. Patient reports that on 04/02, being driven home from therapy by his mother, the car stopped at the corner of Maple Hollow Rd and Birch Ave, where the 02/06/2026 collision happened and where he lives, as a pickup approached on Birch Ave. He describes sudden pounding heartbeat, shortness of breath, shaking and a feeling that he "was going to get hit again"; he got out of the car. Since then he has avoided riding in cars, uses the back door of the house to avoid the corner, sleeps 4–5 hours with dreams of the crash, feels "down" and has withdrawn from friends and pickup basketball. Has kept working; takes the city bus. States he did not answer calls because he "didn't know how to explain it". Reports some nervousness as a passenger since the collision, much worse since 04/02. No prior anxiety, depression or counseling. Denies thoughts of harming himself or others. Neck pain 5/10; right thumb and index finger tingling several times a day, unchanged in character. No weakness. Gabapentin at bedtime continues.

Assessment

1. Cervical radiculopathy, right C6, C5-C6 disc herniation (M50.122), following motor vehicle collision 02/06/2026: no new neurologic symptoms reported; therapy interrupted 04/02 → 04/21/2026.
2. Anxiety with avoidance of car travel, sleep disturbance and low mood following the motor vehicle collision of 02/06/2026, worse since a panic episode at the collision site on 04/02/2026 (F41.9, provisional). Not a psychiatric evaluation; referred for counseling evaluation.

Plan

1. **Referral for counseling evaluation.** Patient reports his employer's Employee Assistance Program (Northgate Distribution, administered by Stonebridge EAP Services) offers counseling at no cost. Referral letter faxed today to Stonebridge EAP Services, (555) 010-7700.
2. **Resume physical therapy** at Riverton Spine & Rehab 2–3×/week. Patient reports evening visits booked from 04/21/2026 with his mother driving; agreed that a route avoiding the collision corner is reasonable.
3. Pain-management referral of 03/27/2026 stands; our referral coordinator will schedule the injection.
4. If thoughts of self-harm occur: call or text 988 or go to the nearest emergency room. Call this office for new weakness or spreading numbness.
5. Follow-up as scheduled.

REFERRAL FOR COUNSELING EVALUATION

To: Stonebridge EAP Services, for the Northgate Distribution Employee Assistance Program, 410 Granite Way, Suite 300, Riverton
Patient: John Doe · DOB 08/14/1991 · (555) 010-2288
From: Alana Reyes, MD, Lakeside Orthopedics
Date: 04/20/2026

I am treating Mr. Doe for a C5-C6 disc herniation with right C6 radiculopathy following a motor vehicle collision on 02/06/2026, in which he was a front-seat passenger. Since the collision he reports anxiety as a passenger, and since a panic episode at the collision site on 04/02/2026 he has avoided car travel, missed four physical therapy visits, slept poorly with dreams of the crash, and reports low mood. He denies thoughts of self-harm.

Please evaluate and treat as you find appropriate. With his written permission, I would appreciate a brief summary of your findings and recommendations.
