REFERRING PHYSICIAN		ADDENDUM BY	
Alana Reyes, MD · Lakeside Orthopedics		Helen Park, MD · 07/15/2026	

ADDENDUM — CORRECTED CLINICAL HISTORY

Reason for addendum: A transcription error in the clinical history. The history line of the final report of 03/13/2026 gave 02/16/2026 as the injury date. The referral from Lakeside Orthopedics (03/05/2026) and the patient's intake history give the motor vehicle collision as 02/06/2026.

CORRECTED CLINICAL HISTORY: MVA, date of injury 02/06/2026, neck pain with right arm numbness.

Scope: This addendum corrects the clinical history only. The technique, findings and impression of the 03/13/2026 report are unchanged and are not re-read:

1. C5-C6 right paracentral disc herniation with mild right foraminal narrowing, contacting the ventral right C6 nerve root, correlating with the stated right arm symptoms. Annular high-intensity signal at this level.
2. Disc height preserved at C5-C6; no significant degenerative change at the adjacent levels.
3. No fracture, ligamentous signal abnormality or cord signal change.

Helen Park, MD

Health Information Management — release record. Amendment requested in writing by LSH Law Group (Case Manager, for Atty. Elijah Thorne), received 07/06/2026, with the patient's claim-specific HIPAA authorization on file. Request limited to the date in the clinical history. Reviewed by the reading radiologist; addendum appended to the permanent record and released 07/15/2026 by Marisol Ortega, HIM Supervisor. Copies sent: LSH Law Group; Lakeside Orthopedics (fax). The original report is retained unaltered with this addendum attached.
