DAILY VISIT NOTES & ATTENDANCE LOG

Episode of care 02/24/2026 – 06/05/2026 · Cervical (MVC 02/06/2026)

PATIENT	DOB	ACCOUNT
John Doe	08/14/1991	RSR-26-0412
PLAN OF CARE	**VISITS ATTENDED**	**MISSED (NO CHARGE)**
Chiropractic + PT, 2–3×/week, 12 weeks (from 02/24/2026); extended to 06/05/2026 at 05/12 re-eval	33	4
FINANCIAL CLASS	**STATUS**	
Letter of Protection — LSH Law Group	Discharged 06/05/2026 — plateau, home program	

Providers: ME = Mark Ellison, DC (chiropractic) · SL = Sara Lin, DPT (physical therapy). Pain = patient-rated neck pain 0–10. Rot R = active cervical rotation to the right (normal 80°). Each attended visit: chiropractic manipulation and/or manual therapy, therapeutic exercise, home exercise review. Notes abbreviated from the daily SOAP record.

#	Date	Day	Time	Prov.	Pain	Rot R	Subjective / Objective / Assessment / Plan (summary)
1	02/24/2026	Tue	4:15 PM	ME/SL	7	40°	Initial evaluation (see separate report). Manipulation C5–T2 low-force; STM R trap/levator; HEP issued (chin tucks, scapular sets).
2	02/26/2026	Thu	4:15 PM	ME/SL	7	42°	Sore after first visit, expected. R hand numbness daily. Tolerated mobilization grade II; neural glide (median) 2×10.
3	03/02/2026	Mon	4:15 PM	ME/SL	6	45°	Slept 5 h. Spasm R trap decreased. Added deep neck flexor holds 5×10 s. Cervical traction trial 10 min — relief.
4	03/03/2026	Tue	4:15 PM	SL	6	45°	PT only. Scapular stabilization progressed (rows, yellow band). Tingling with ext >25°.
5	03/05/2026	Thu	1:30 PM	ME/SL	6	48°	Ortho consult this a.m. (MRI ordered). Adjusted C6-C7 R. Traction 12 min. Numbness thumb/index unchanged.
6	03/09/2026	Mon	4:15 PM	ME/SL	6	50°	Better sleep. Meloxicam started per ortho. HEP compliance good. Tolerated progression.
7	03/10/2026	Tue	4:15 PM	SL	5	50°	PT. Rows green band 3×12; isometrics 4 directions. Numbness 3–4×/day.
8	03/12/2026	Thu	4:15 PM	ME/SL	5	52°	Segmental restriction C5-C6 R improving. Spurling's still + R.
9	03/16/2026	Mon	4:15 PM	ME/SL	5	55°	MRI done 03/13 (report to ortho). Overhead work at job still flares.
10	03/17/2026	Tue	4:15 PM	SL	5	55°	PT. Added prone Y/T; upper trap stretch. Grip R 41 kg.
11	03/19/2026	Thu	4:15 PM	ME/SL	4	58°	Pt reports last day of rental car today; carpool with coworker for now. Tolerated tx.
12	03/23/2026	Mon	4:15 PM	ME/SL	4	58°	Pain 4/10. Numbness 2–3×/day. Traction continued.
13	03/24/2026	Tue	4:15 PM	ME/SL	4	60°	30-day re-evaluation: NDI 46% → 32%; rot R 60° / L 70°; ext 40°. Continue plan 2–3×/wk.
14	03/26/2026	Thu	4:15 PM	ME/SL	4	60°	Stable. HEP reviewed. Grip R 43 kg.
15	03/31/2026	Tue	4:15 PM	SL	4	62°	PT. Pt states carpool ending this week (coworker's shift changing). Discussed options.
16	04/02/2026	Thu	4:15 PM	ME/SL	4	62°	Tolerated tx. Gabapentin at night helping sleep. Next appts 04/03, 04/07, 04/09, 04/14 (daytime).

#	Date	Day	Time	Prov.	Pain	Rot R	Subjective / Objective / Assessment / Plan (summary)
	04/03/2026	Fri	4:15 PM	**No show** · no charge			No call. Left voicemail 04/03 5:10 PM.
	04/07/2026	Tue	4:15 PM	**No show — transportation** · no charge			Pt called 04/07 2:40 PM: no ride (rental ended, carpool ended). Missed-visit alert to LSH Law Group 04/08.
	04/09/2026	Thu	4:15 PM	**No show — transportation** · no charge			Kept on daytime book pending evening opening; no ride.
	04/14/2026	Tue	4:15 PM	**No show** · no charge			No call. Evening slots confirmed from 04/21.
17	04/21/2026	Tue	6:00 PM	ME/SL	6	55°	Returned (evening slot; mother driving). 19 days since last visit. Neck pain up to 6/10, rot R lost 7°. Resumed plan; HEP re-taught.
18	04/23/2026	Thu	6:00 PM	ME/SL	5	56°	Attendance confirmed by LSH Law Group phone check. Spasm R trap returning to baseline.
19	04/28/2026	Tue	6:00 PM	SL	5	58°	PT. Rows green band; DNF holds 5×10 s. Numbness 3×/day.
20	04/30/2026	Thu	6:00 PM	ME/SL	5	58°	Own car back from repair shop (04/24) per pt. Tolerated tx.
21	05/04/2026	Mon	6:00 PM	ME/SL	4	60°	Improving. Traction 12 min. Spurling's + R, milder.
22	05/05/2026	Tue	6:00 PM	SL	4	60°	PT. Added wall slides and serratus punches. Grip R 42 kg.
23	05/07/2026	Thu	6:00 PM	ME/SL	4	62°	Injection scheduled 05/15 at Crescent Pain & Spine.
24	05/11/2026	Mon	6:00 PM	ME/SL	4	62°	Stable. Overhead work 30 min before tingling.
25	05/12/2026	Tue	6:00 PM	ME/SL	4	64°	Re-evaluation: NDI 28%; rot R 64° / L 72°. Plan extended through 06/05 (care interrupted 04/02–04/21).
26	05/14/2026	Thu	6:00 PM	ME/SL	4	64°	Pre-injection visit; light treatment. Hold manipulation 72 h after ESI.
27	05/19/2026	Tue	6:00 PM	SL	3	66°	Post-ESI (05/15) day 4: arm pain clearly better. PT only, no manipulation today.
28	05/21/2026	Thu	6:00 PM	ME/SL	3	68°	Numbness 1×/day. Resumed low-force adjusting.
29	05/26/2026	Tue	6:00 PM	ME/SL	3	68°	Progressing. Band rows red; prone Y/T 3×10.
30	05/28/2026	Thu	6:00 PM	ME/SL	2	70°	Pain 2/10. Full shift without flare this week.
31	06/02/2026	Tue	6:00 PM	SL	2	70°	PT. Independent with full HEP. Grip R 45 kg.
32	06/04/2026	Thu	6:00 PM	ME/SL	2	70°	No change since 05/28 — plateau. Discharge planned next visit.
33	06/05/2026	Fri	6:00 PM	ME/SL	2	70°	Discharge visit: NDI 18%. Residual intermittent R hand paresthesia. Home program; return to Dr. Reyes 06/12.

Totals: 33 visits attended (16 from 02/24 to 04/02/2026; 17 from 04/21 to 06/05/2026) · 4 missed (04/03, 04/07, 04/09, 04/14/2026), no charge · longest interval without a visit 04/02 → 04/21/2026 (19 days).

MISSED-VISIT ALERT

TO LSH Law Group — Case Manager (file LSH-2026-MVA-770412)	DELIVERED By email; voicemail left at (555) 010-4000 ext. 214
FROM Tammy Greer, Office Manager	RE John Doe · DOB 08/14/1991 · LOP account RSR-26-0412

Per your Letter of Protection dated 02/23/2026, we are letting you know that your client has missed scheduled visits:

Date	Appointment	Status
04/03/2026 (Fri)	4:15 PM chiro + PT	No show — no call
04/07/2026 (Tue)	4:15 PM chiro + PT	No show — patient called 2:40 PM, no transportation

Mr. Doe told our front desk that his rental car ended and his ride to work and to appointments is no longer available. He is booked 04/09 and 04/14 at 4:15 PM. Dr. Ellison and Ms. Lin recommend he continue 2–3 visits per week; a gap in care at this stage may slow his progress. Please contact your client. Our evening schedule (6:00 PM) is full until the week of 04/20; we have put him on the evening wait list.

Tammy Greer

Tammy Greer, Office Manager, Riverton Spine & Rehab

> **Front desk log — 04/08/2026 3:20 PM.** Call from LSH Law Group (Case Manager): spoke with patient today; patient's mother can drive him after her work shift. Requests evening slots. Booked Tue/Thu 6:00 PM starting 04/21/2026 (first opening), plus Monday evenings as they open. Daytime 04/09 and 04/14 left on the book in case a ride is found. — TG
> **04/21/2026 6:48 PM.** Patient attended. Attendance confirmed to LSH Law Group by phone 04/21 and 04/23. — TG

DISCHARGE SUMMARY

Date of discharge 06/05/2026 (Fri)

Measure	Initial 02/24	Re-eval 03/24	Re-eval 05/12	Discharge 06/05
Neck pain (0–10)	7	4	4	2
Neck Disability Index	46%	32%	28%	18%
Rotation right / left	40° / 55°	60° / 70°	64° / 72°	70° / 76°
Grip strength right / left	38 / 46 kg	43 / 46 kg	42 / 46 kg	45 / 46 kg
Spurling's (right)	positive	positive	positive, milder	equivocal

Course. 33 visits between 02/24/2026 and 06/05/2026. Steady improvement through 04/02/2026. Care was interrupted 04/02 → 04/21/2026 (19 days; four missed visits, transportation); pain and rotation regressed on return and recovered over the following two weeks. Cervical epidural steroid injection 05/15/2026 (Crescent Pain & Spine) with clear improvement in arm symptoms afterward. Gains have leveled off since 05/28/2026.

Status at discharge. Neck pain 2/10, worse with prolonged overhead work. Residual intermittent right-hand paresthesia (thumb and index finger), about once a day. Working full shifts.

Plan. Discharged from active care — plateau. Independent home exercise program (deep neck flexor holds, band rows, prone Y/T, upper trap and levator stretches, nerve glides) daily. Follow up with Dr. Alana Reyes, Lakeside Orthopedics, 06/12/2026. Return to this office on referral if symptoms flare.
